

ANA to paint the number 787 on its Dreamliners

TOKYO December 27, 2011 ANA, Japan's largest airline and the launch customer of the Boeing 787 Dreamliner, today unveiled the design of its third Dreamliner. The number 787 will be painted on to the front of all further ANA Dreamliners to be delivered in FY2012. The numbers will be painted in big, bold, blue font at the front of the aircraft so that it is easily recognizable as the 787 Dreamliner.

The first two ANA Dreamliners already operating on ANA's domestic service are painted with the numbers in a different shade of blue.

Aircraft carrying the numbers 787 on standard ANA livery: to be used on the third aircraft onwards
