May 27, 2016	ANA	561	Haneda	Kochi	JA85AN	B737-800	During climb after takeoff at 5,000 m 50 km southwest of Haneda Airport, the instruments indicated a decrease in cabin pressurization (cabin altitude warning) so the aircraft conducted an ATB. There were 170 people on board, consisting of two flight crew members, four cabin attendants and 164 passengers (including one infant). One passenger was diagnosed with aviation middle ear inflammation to both ears and perforation of the left eardrum. The aircraft was not damaged.
