3 Sample Receipt Date: 07 Jan 2021, 11:14 (CET)
Sample Type: [REDACTED] **7**
Collection Date: 07 Jan 2021, 10:28 (CET) **6**
Date of Finding: 07 Jan 2021, 10:28 (CET)
Nature of the Findings: Final Findings

2 Patient No.: [REDACTED] First Name: [REDACTED] Last Name: [REDACTED]
Date of Birth: [REDACTED]

4 Testing method: RT-PCR

5 **NEGATIVE FINDINGS** // There is no recognizably increased risk of infection for contact persons

INTERPRETATION
No SARS-CoV-2 specific RNA could be detected. An infection with SARS-CoV-2 is not detectable in the examined sample with the applied method. An increased risk of infection for third parties is currently not apparent. No conclusions can be drawn about past and cured infection statuses, as well as not yet sufficiently advanced (incubation phase) or future infections with SARS-CoV-2. In case of suspected infection or contact with SARS-CoV-2 carriers, a physician should be consulted, and a control should be carried out at short notice.
